

KNOWLEDGE LABS

General description

Three **Knowledge Labs** will be organized during the first meeting of the Conference of the Parties to the Minamata Convention on Mercury (COP-1).

The **Knowledge Labs** are 45 minute sessions, envisaged as a platform where stakeholders can share relevant information in relation to the life cycle of mercury and the Minamata Convention.

The **Knowledge Labs** will take place from 18.15 to 19.00 on Sunday 24 September, Monday 25 September, and Wednesday 27 September at the Geneva International Conference Centre (CICG).

Three **Knowledge Labs** slots will be available for those who wish to use the opportunity of the Conference of the Parties to bring more in-depth understanding to a specific issue relevant to the implementation of the Minamata Convention. The **Knowledge Labs** will be held in an area close to the exhibition area. The **Knowledge Labs** will allow for detailed presentation of a specific item relevant to the implementation of the Minamata Convention and will provide opportunity for interactive participation.

Please contact the interim Secretariat of the Minamata Convention on Mercury by 1 September 2017 to secure a slot.
